Chris Zemanek  
The Scotts Company, LLC  
14111 Scottslawn Road  
Marysville, Ohio 43041

**Subject:** Notification per PRN 98-10: Adds three new alternate brand names- “Ortho® Garden Defense Fruit and/ & Vegetable Disease Control Concentrate”; “Ortho® Garden Defense Fruit and/ & Vegetable Disease Control”; “Ortho® Garden Defense Disease Control for Fruits and/ & Vegetables”; adds marketing claims; other minor changes

Product Name: Ortho Daconil 2787 Multipurpose Fungicide  
EPA Registration Number: 239-2522  
Application Date: August 21, 2017  
Decision Number: 532808

Dear Mr. Zemanek:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for the above referenced product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10. The label submitted with the application has been stamped “Notification” and will be placed in our records. The following new ABNs are accepted:

Ortho® Garden Defense Fruit and/ & Vegetable Disease Control Concentrate  
Ortho® Garden Defense Fruit and/ & Vegetable Disease Control  
Ortho® Garden Defense Disease Control for Fruits and/ & Vegetables

Should you wish to add/retain a reference to the company’s website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA’s Office of Enforcement and Compliance.

## Combination Spray(s) with Insecticides - on Ornamental Plants

ORTHO® DACONIL 2787 Multi-purpose Fungicide [ORTHO Garden Disease Control] may be mixed with the following insecticides for use on ornamental plants (at the label rates for both products): ORTHO Bug-B-Gon Max Lawn and Garden Insect Killer, ORTHO MAX Malathion Insect Spray Concentrate, or ORTHO® Systemic Insect Control. Apply fungicide on a regular schedule to control disease and add insecticide only when insect control is desired. Do not apply more than three consecutive applications of combination sprays. Do not use combination sprays with Dial-n-Spray or similar devices.

**STORAGE AND DISPOSAL [icon]**

**PESTICIDE STORAGE:** Keep pesticide in original container. Do not put concentrate or dilute into food or drink containers. Avoid contamination of feed and foodstuffs. Store in a cool, dry place, preferably in a locked storage area.

**PESTICIDE DISPOSAL: If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

**CONTAINER DISPOSAL: If empty:** Nonrefillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available.

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS & DOMESTIC ANIMALS**

**WARNING:** Causes substantial but temporary eye injury. Causes skin irritation. Harmful if inhaled. Do not get in eyes, on skin, or on clothing. Avoid breathing spray mist. Prolonged or frequently repeated skin contact may cause allergic reaction in some individuals. Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove contaminated clothing and wash before reuse.

**Note to User:** Product may produce temporary allergic side effects characterized by redness of the eyes, mild bronchial irritation, and redness or rash on exposed skin areas. Persons having allergic reaction should contact a physician.

**FIRST AID**

**If in eyes:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

**If on skin or clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

**If swallowed:** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

**If inhaled:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

**Note to Physicians:** Persons suffering with temporary allergic skin reactions may respond to treatment with oral antihistamines and topical or oral steroids. Emergency Information Call 1-800-225-2883.

[Notice : This product contains Chlorothalonil, a chemical known to the State of California to cause cancer. **OR** Notice : This product can expose you to Chlorothalonil which is known to the state of California to cause cancer. For more information go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov)]

**ENVIRONMENTAL HAZARDS:**

This pesticide is toxic to aquatic invertebrates and wildlife. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Rinsing application equipment over the treated area will help avoid run off to water bodies or drainage systems. Drift and runoff may be hazardous to aquatic organisms in neighboring areas. This chemical is known to leach through soil into groundwater under certain conditions as a result of label use. Use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

This chemical can contaminate surface water through spray drift. Under some conditions, it may also have a high potential for runoff into surface water for several days to weeks after application. These
